

# MATERNAL HEALTH EQUITY: scale of impact

In the developed world, the United States is the most dangerous place to give birth—especially for women of color.<sup>1</sup> Grasping the extent of maternal health disparities is the first step in being able to provide support to expectant mothers in your workforce.

## 85%

The vast majority of women in the workplace (85%) will become mothers during their careers.<sup>2</sup>

## 50K

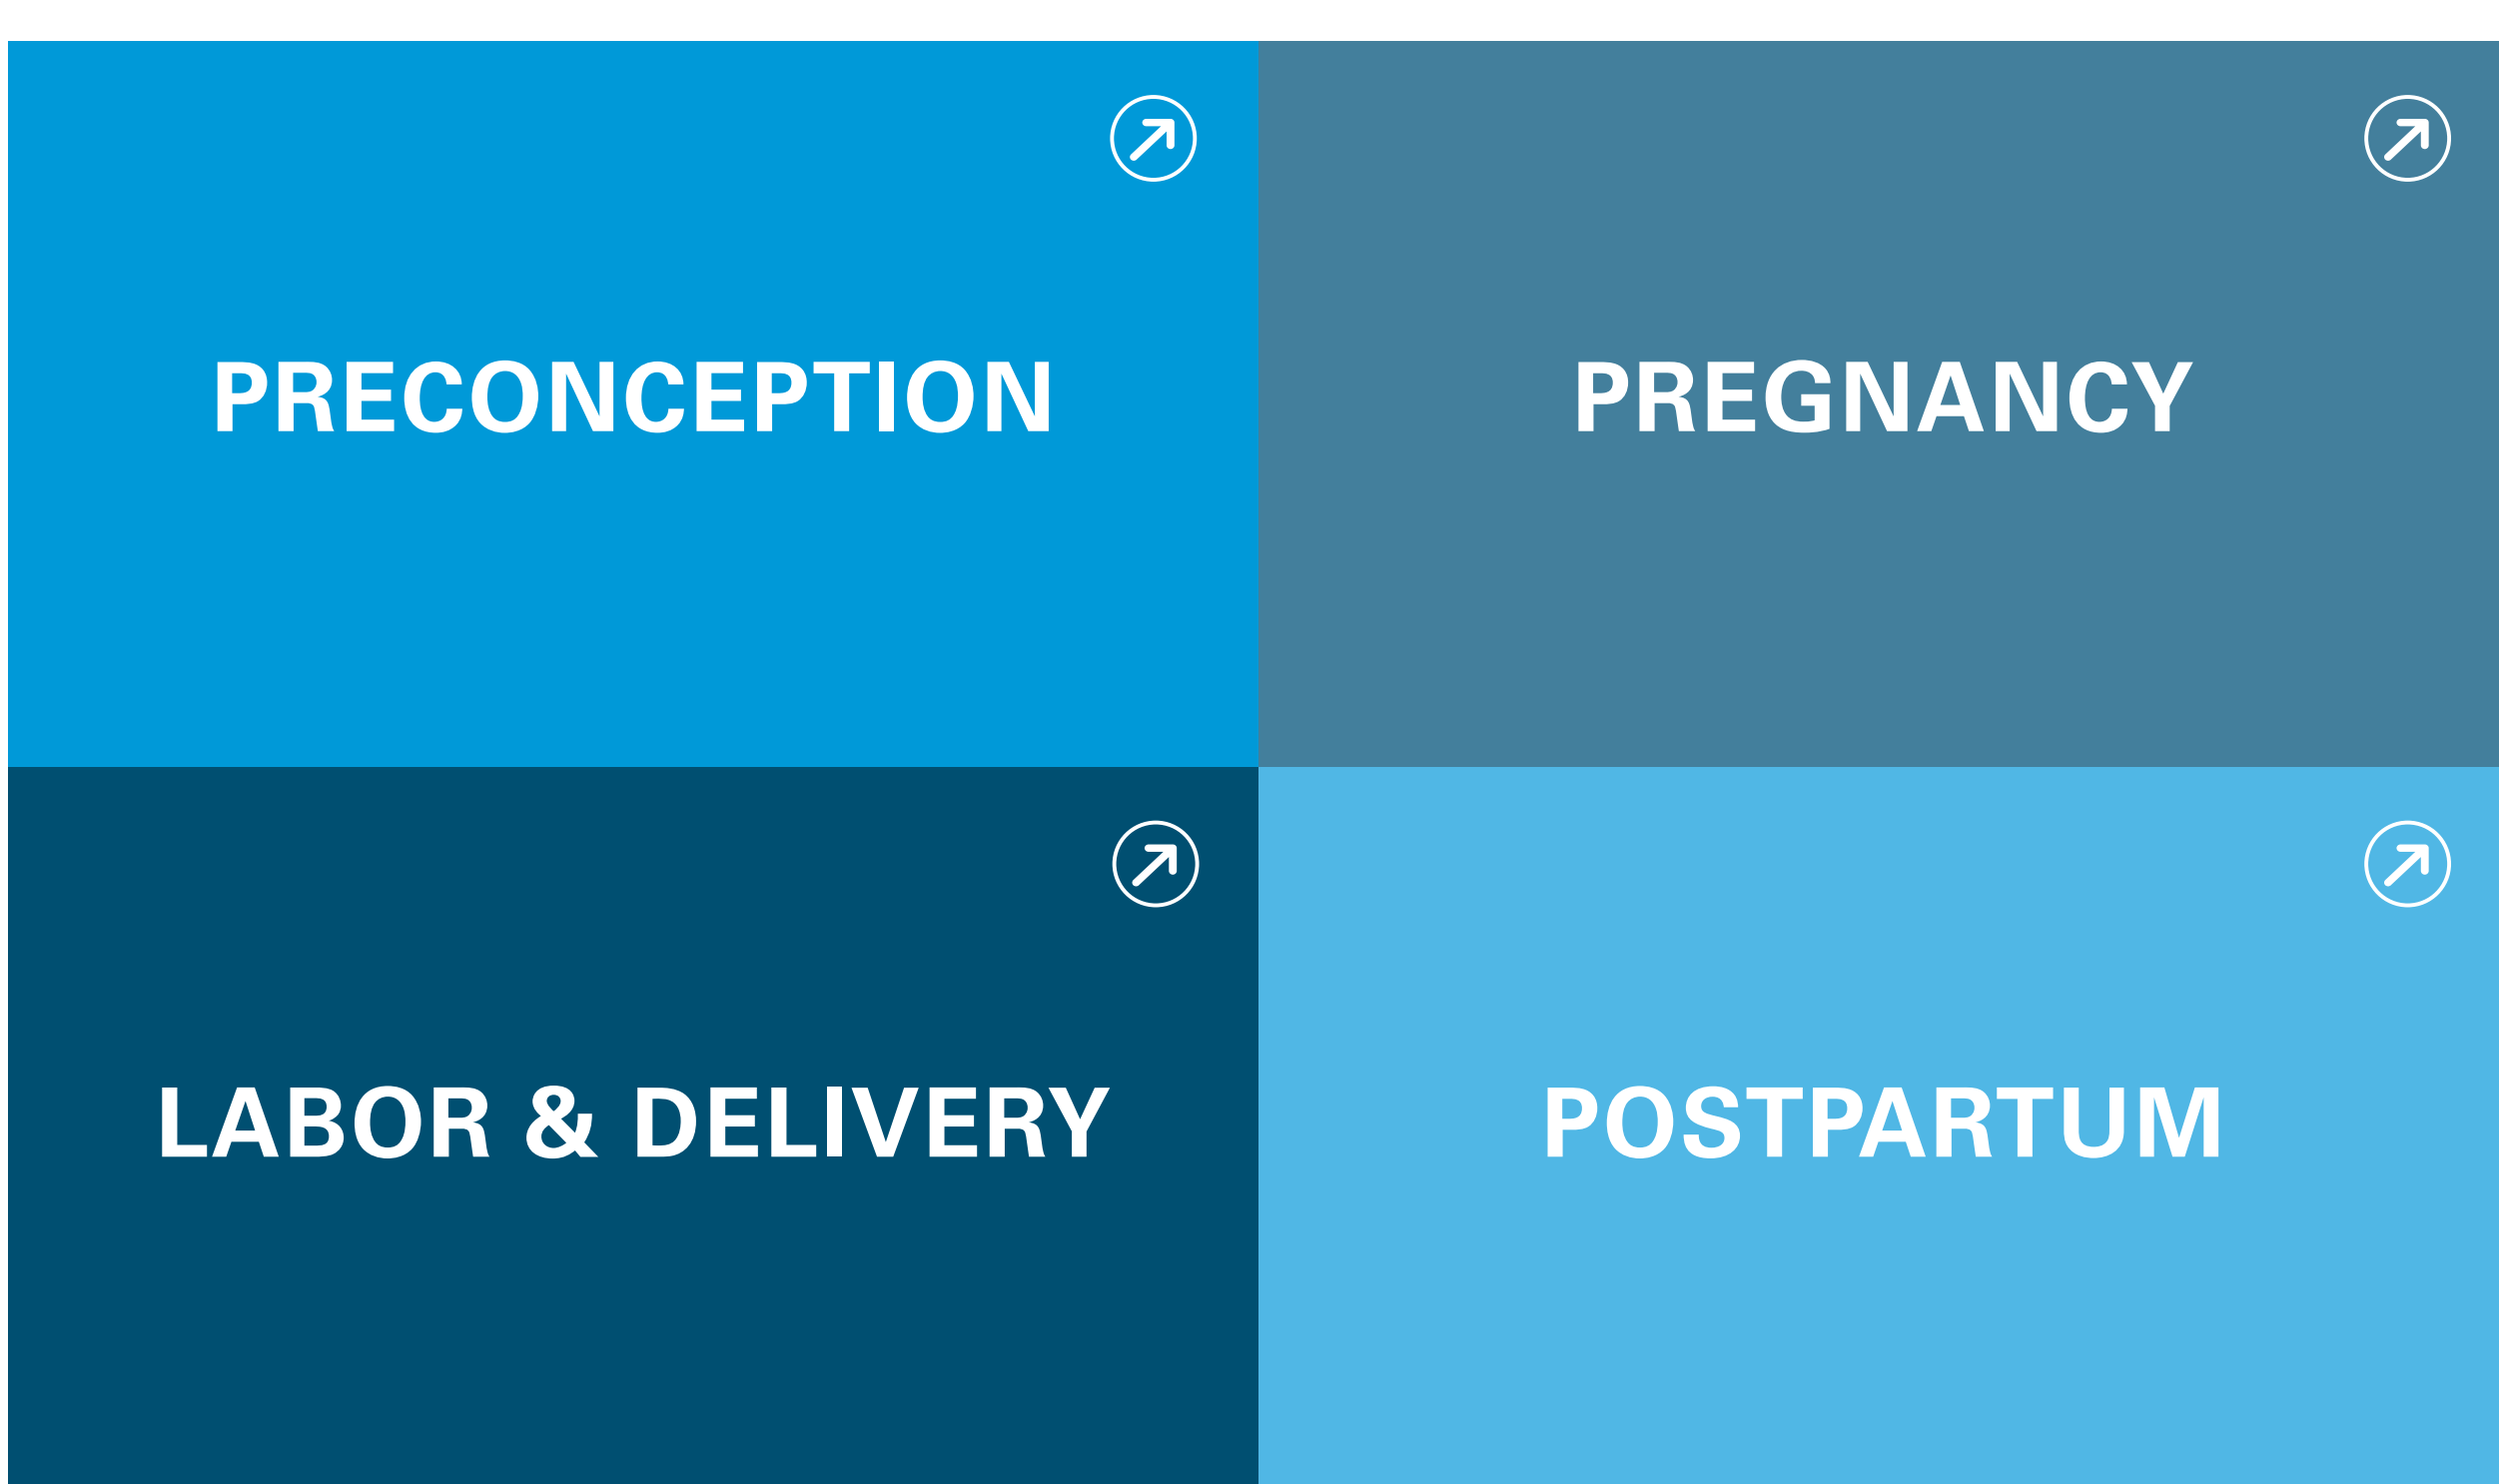

Each year, 50,000 women suffer from life-threatening pregnancy complications.<sup>3</sup>

## ↑63%

Women in majority Black communities face 63 percent higher rates of severe maternal morbidity (SMM) than women in majority white communities.<sup>4</sup>

## Take a closer look at maternal health disparities before, during and after pregnancy.

## Impact on employers

With women accounting for nearly half the American workforce,<sup>18</sup> maternal health disparities can have a huge impact on the health and overall well-being of your employees, their families and your business.

To help advance maternal health equity, employers can support improving access to quality care.
