

ACA Preventive Drug List

Effective January 1, 2026

Recommendations by

**United States Preventive Services Task Force (USPSTF),
Health Resources and Services Administration (HRSA), and
Advisory Committee on Immunization Practices (ACIP, adopted by the Centers for Disease Control).**

Under the Affordable Care Act (ACA) some medications may have limited or \$0 cost-sharing; examples of categories of medications that may be subject to limited or \$0 cost share include aspirin, breast cancer preventive, fluoride supplements, folic acid supplements, iron supplements, tobacco cessation, immunizations (see covered vaccines on list below), bowel preparation for colonoscopy, and some contraceptive medications and devices.

The drugs listed below are grouped into broad categories. Each category includes an alphabetical list of drugs. **Please refer to your benefit materials for coverage details and the plan website for current information as this list will be reviewed periodically and is subject to change.**

If you require a medication, i.e., an oral contraceptive, that is not currently provided at a zero-dollar cost share, an exception process does exist. More information about this process can be found at www.bluecrossnc.com/umdrug

Generic prescription drugs are shown in lower-case boldface type. Most generic drugs are followed by a reference brand drug in (parentheses). Some generic products have no reference brand. Brand prescription drugs are shown in all capital letters followed by the generic name. Generic medicines may be available for many of the brand-name drugs listed though may not be available in all strengths.
