

Social Need Screening and Intervention (SNS-E)

HEDIS[®] (Healthcare Effectiveness Data Information Set) is a widely used set of performance measures developed and maintained by NCQA. These are used to drive improvement efforts surrounding best practices.

The HEDIS quality measures reported using the Electronic Clinical Data Systems (ECDS) inspire innovative use of electronic clinical data to document high-quality patient care that demonstrates commitment to evidence-based practices. Organizations that report HEDIS using ECDS encourage the electronic exchange of the information needed to provide high-quality services, ensuring that the information reaches the right people at the right time.

Note: HEDIS[®] is a registered trademark of the National Committee for Quality Assurance (NCQA).

This measure assesses the percentage of patients who were screened, using prespecified instruments, at least once during the measurement period for unmet food, housing and transportation needs, and received a corresponding intervention if they screened positive:

- Food screening: The percentage of patients who were screened for food insecurity
- Food intervention: The percentage of patients who received a corresponding intervention within one month of screening positive for food insecurity
- Housing screening: The percentage of patients who were screened for housing instability, homelessness or housing inadequacy
- Housing intervention: The percentage of patients who received a corresponding intervention within one month of screening positive for housing instability, homelessness or housing inadequacy
- Transportation screening: The percentage of patients who were screened for transportation insecurity
- Transportation intervention: The percentage of patients who received a corresponding intervention within one month of screening positive for transportation insecurity

Record Your Efforts:

- Food insecurity: Uncertain, limited, or unstable access to food that is: adequate in quantity and in nutritional quality; culturally acceptable; safe and acquired in socially acceptable ways
- Housing instability: Currently consistently housed but experiencing any of the following circumstances in the past 12 months: being behind on rent or mortgage, multiple moves, cost burden or risk of eviction
- Homelessness: Currently living in an environment that is not meant for permanent human habitation (for example, cars, parks, sidewalks, abandoned buildings, on the street), not having a consistent place to sleep at night, or because of economic difficulties, currently living in a shelter, motel, temporary or transitional living situation
- Housing inadequacy: Housing does not meet habitability standards
- Transportation insecurity: Uncertain, limited or no access to safe, reliable, accessible, affordable, and socially acceptable transportation infrastructure and modalities necessary for maintaining one’s health, well-being, or livelihood

Exclusions:

- Patients who use hospice services or elect to use a hospice benefit any time during the measurement year
- Patients who die any time during the measurement period
- Medicare patients 66 years of age and older by the end of the measurement period who meet either of the following:
 - Enrolled in an Institutional Special Needs Plan (I-SNP) any time during the measurement period
 - Living long-term in an institution any time during the measurement period, as identified by the LTI flag in the Monthly Membership Detail Data File

Helpful Tips:

- Ask your patients about their social needs. Patients may need to be prompted to discuss non-medical issues with their provider.
- Explain the purpose of the screening with the patient and offer support and resources as appropriate.
- Allow for adequate time, space, and privacy for the patient to discuss their social needs.
- Educate your staff of the importance of screening, documenting, and coding patients’ social needs.

Our Supplemental Data Team is here to help. For additional support in submitting supplemental data for ECDS measures, send inquiries to supplementaldata@healthybluenc.com.

Find eligible screening instruments with thresholds for positive findings on pages 4 to 6.

Patient Care Opportunities

You can find patient care opportunities within the Patient360 application located on Availity Essentials Payer Spaces. To access the Patient360 application you must have the Patient360 role assignment. From Availity's home page select Payer Spaces, then choose the health plan from the menu. Choose the Patient360 tile from the Payer Space Applications menu and complete the required information on the screen. Gaps in care are located in the Active Alerts section of the Patient Summary.
