(HMO-POS D-SNP)

Advanced Illness and Frailty Exclusions 2025

Healthcare Effectiveness Data Information Set® (HEDIS) is a widely used set of performance measures developed and maintained by NCQA. These are used to drive improvement efforts surrounding best practices.

HEDIS® is a registered trademark of the National Committee for Quality Assurance (NCQA).

Definitions:

- **Advanced illness:** severe chronic conditions that cause general health and function decline
- **Frailty:** limited mobility or physical functional impairment that may require the use of durable medical equipment

Important Notes:

- The following section from HEDIS 2025 targets optimizing care for advanced illness and frailty patients.
- Frailty and advanced illness measures apply to various medical realms from cancer to diabetes.
- This reference notes exclusions or adjustments made to enhance care, ensuring it aligns more closely with the patient's health status.

<https://bluecrossnc.com/providers/networks-programs/blue-medicare/healthy-blue-medicare>

Blue Cross and Blue Shield of North Carolina Senior Health, DBA Blue Cross and Blue Shield of North Carolina, is an HMO-POS D-SNP plan with a Medicare contract and a NC State Medicaid Agency Contract (SMAC). Enrollment in Blue Cross and Blue Shield of North Carolina Senior Health depends upon contract renewal.

®, SM are marks of the Blue Cross Blue Shield Association, an association of independent Blue Cross and Blue Shield plans. All other marks and names are property of their respective owners. Blue Cross and Blue Shield of North Carolina is an independent licensee of the Blue Cross Blue Shield Association.

NCBCBS-CR-074991-24-CPN74691 March 2025

Purpose

For those with limited life expectancy or advanced illness, the services identified in some measures may not be relevant or in line with the patient's goals of care. By implementing these exclusions, this population can focus on care that is more appropriate for their conditions and health status (for example, improving care transitions, getting follow-up after acute care episodes, or avoiding preventable hospitalizations). Exclusions also aim to ensure that frail older adults are not burdened with unnecessary tests or treatments that would benefit them little and may even pose harm.

For more information on improving care for those with advanced illness and frailty, visit <https://ncqa.org/blog/improving-care-advanced-illness-frailty>.

What Qualifies as a Frailty or Advanced Illness Exclusion?

Frailty

At least two indications of frailty with different dates of service during 2025. Do not include laboratory claims (claims with POS code 81).

Advanced Illness

Any of the following during 2024 and/or 2025 meet criteria. Do not include laboratory claims (claims with POS code 81):

- At least two outpatient visits, observation visits, emergency department visits, telephone visits, e-visits, virtual check-ins, or non-acute inpatient discharges (the diagnosis must be on the discharge claim) on different dates of service with an advanced illness diagnosis. Visit type does need not be the same for the two visits.
- At least one acute inpatient encounter with an advanced illness diagnosis on the discharge claim
- At least one acute inpatient discharge with an advanced illness diagnosis on the discharge claim
- A dispensed dementia medication:
 - Cholinesterase inhibitors (donepezil, galantamine, rivastigmine)
 - Miscellaneous central nervous system agents (memantine)
 - Dementia combinations (donepezil-memantine)

Note: Exclusions for advanced illness, frailty, and dispensed dementia medications must come from claims.

Applicable Measures

Measure	Description
Advanced Care Planning (ACP)	66 to 80 years of age* with frailty and advanced illness or 81 years old and older* with frailty
Breast Cancer Screening (BCS-E)	66 years of age and older* with frailty and advanced illness
Blood Pressure Control for Patients With Diabetes (BPD)	66 years of age and older* with frailty and advanced illness
Blood Pressure Control for Patients With Hypertension (BPC-E)	66 to 80 years of age* with frailty and advanced illness or 81 years old and older* with frailty
Colorectal Cancer Screening (COL-E)	66 years of age and older* with frailty and advanced illness
Controlling High Blood Pressure (CBP)	66 to 80 years of age* with frailty and advanced illness or 81 years old and older* with frailty
Cardiac Rehabilitation (CRE)	66 to 80 years of age* with frailty and advanced illness or 81 years old and older* with frailty
Eye Exam for Patients With Diabetes (EED)	66 years of age and older* with frailty and advanced illness
Glycemic Status Assessment for Patients With Diabetes (GSD)	66 years of age and older* with frailty and advanced illness
Kidney Health Evaluation for Patients With Diabetes (KED)	66 to 80 years of age and older* with frailty and advanced illness or 81 years of age and older* with frailty
Use of Imaging Studies for Low Back Pain (LBP)	66 years of age and older* with frailty and advanced illness
Osteoporosis Management In Women Who Had a Fracture (OMW)	67 to 80 years of age* with frailty and advanced illness or 81 years old and older* with frailty
Osteoporosis Screening in Older Women (OSW)	66 years of age and older* with frailty and advanced illness
Persistence of Beta-Blocker Treatment After a Heart Attack (PBH)	66 to 80 years of age* with frailty and advanced illness or 81 years old and older* with frailty

Adherence to Antipsychotic Medications for Individuals With Schizophrenia (SAA)	66 to 80 years of age* with frailty and advanced illness or 81 years old and older* with frailty
Statin Therapy for Patients With Cardiovascular Disease (SPC)	66 years of age and older* with frailty and advanced illness

* Age as of December 31, 2025

Examples (lists not inclusive)

Advanced Illness	Frailty
Alcoholic fibrosis and cirrhosis of the liver	Ataxic gait
Alzheimer's disease	Cane, walker, wheelchair*
Chronic and acute heart failure, various stages	Commode chair*
Chronic renal disease	Dependence on enabling machines and devices
Chronic respiratory failure	Difficulty in walking
Dementia	Falls
Emphysema	Home ventilator
Hepatitis	Hospital bed*
Hypertensive heart disease	Nursing care in home
Leukemia	Portable and stationary oxygen*
Malignant neoplasms of specific sites	Pressure ulcer
Parkinson's disease	Private duty nursing
Pulmonary fibrosis	Registered nurse (RN) skilled services
Rheumatic heart failure	Weight loss or underweight

* Requires a prescription. Medical equipment must be billed during 2025.
