<b>Clinical Assessment (please check all that apply)</b>	<p><input type="checkbox"/> Confirmed diagnosis of severe major depressive disorder (single or recurrent) documented by standardized rating scales that reliably measure depressive symptoms <b>(Please include as separate attachment)</b></p> <p><input type="checkbox"/> Is rTMS ordered for continued treatment of the brain as maintenance therapy?   <input type="checkbox"/> Yes   <input type="checkbox"/> No</p>																																																																			

**Transcranial Magnetic Stimulation - TMS**

<b>Patient Name</b>	<b>Blue Cross NC Patient ID number</b>	<b>Patient Date of Birth</b>

Please provide rationale for why electroconvulsive therapy would not be clinically superior to rTMS for this patient (i.e. in cases with psychosis, acute suicidal risk, catatonia or life-threatening inanition rTMS should NOT be used):

Failure of a trial of a psychotherapy known to be effective in the treatment of major depressive disorder of an adequate frequency and duration, without significant improvement in depressive symptoms, as documented by standardized rating scales that reliably measure depressive symptoms.

Please List Dates and Response to Treatment

Dates of Treatment	Response to Treatment

Does the patient exhibit any current signs or past history of? (please check all that apply)

- Seizure Disorder or any history of seizure with increased risk of future seizure
- Presence of acute or chronic psychotic symptoms or disorders (i.e. schizophrenia, schizophreniform or schizoaffective disorder) in the current depressive episode
- Neurologic conditions that include epilepsy, cerebrovascular disease, dementia, increased intracranial pressure, having a history of repetitive or severe head trauma, or with primary or secondary tumors in the central nervous system
- Presence of an implanted magnetic-sensitive medical device located within 30 centimeters from the TMS magnetic coil or other implanted items including but not limited to a cochlear implant, implanted cardioverter defibrillator, pacemakers, vagus nerve stimulator or metal aneurysm clips or coils, staples, or stents.

**For EXTENSION of acute or maintenance treatment ONLY:**

- Response to acute treatment:
- Goal/Rationale of continued acute treatment:

**Transcranial Magnetic Stimulation - TMS**
