

Important Information for Blue Care Members:

Lactation (breastfeeding) Counseling services are available for members of non-grandfathered individual health insurance plans. If you receive benefits from your employer, you may also have these benefits. If your Summary of Benefits section of your Benefit Booklet contains PREVENTIVE CARE covered under federal law, then you have these benefits at no extra cost if provided by an in-network provider. Below, you will find provider lists by product/network that may perform lactation counseling services; this list is not exhaustive. If you do not see your in-network provider on the list below, please contact the provider to determine if these services are offered. Lactation counseling services are also provided immediately post-partum while the member is in the hospital.

The Blue Cross and Blue Shield of North Carolina (Blue Cross NC) online provider directory is developed using information from network providers, facilities, and other third parties. Blue Cross NC does its best to post the most accurate, up-to-date information. However, because providers are continually added to our network and providers occasionally decide to discontinue their participation, we cannot guarantee the accuracy or currency of our information at the time of your search. For the most current information, please contact customer service by calling the number on the back of your Member ID card.
