

Enhanced - High Deductible Health Plan Preventive Drug List

A drug is considered to be used for preventive purposes if it is being prescribed primarily (1) to prevent the symptomatic onset of a condition in a person who has developed risk factors for a disease that has not yet become clinically apparent or (2) to prevent recurrence of a disease or condition from which the patient has recovered. A drug is not considered preventive if it is being prescribed to treat an existing symptomatic illness, injury or condition.

This list is specific to HDHP Enhanced formulary benefit plans; not Affordable Care Act (ACA) mandated preventive benefits. To verify if you are eligible for these benefits, use our secure website (mybcbsnc.com) that details the specific benefits for your plan, review your benefit booklet or call the Customer Service number listed on your BCBSNC ID card. This drug list does not apply to the NetResults 5 Tier C formulary.
