Description of Procedure or Service

Alemtuzumab (Lemtrada®) is a CD52-directed cytolytic monoclonal antibody indicated for the treatment of adult patients with relapsing forms of multiple sclerosis (MS), to include relapsing-remitting disease and active secondary progressive disease. Because of its safety profile, the use of alemtuzumab (Lemtrada) should generally be reserved for patients who have had an inadequate response to two or more drugs indicated for the treatment of MS.

Alemtuzumab (Lemtrada) is a recombinant humanized IgG1 kappa monoclonal antibody directed against the cell surface glycoprotein, CD52. The precise mechanism by which alemtuzumab exerts its therapeutic effects in multiple sclerosis is unknown but is presumed to involve binding to CD52, a cell surface antigen present on T and B lymphocytes, and on natural killer cells, monocytes, and macrophages. Following cell surface binding to T and B lymphocytes, alemtuzumab results in antibody-dependent cellular cytotoxicity and complement-mediated lysis. Based on animal data, Alemtuzumab (Lemtrada) may cause fetal harm.

******Note: This Medical Policy is complex and technical. For questions concerning the technical language and/or specific clinical indications for its use, please consult your physician.***

Policy

BCBSNC will provide coverage for Alemtuzumab (Lemtrada) for relapsing multiple sclerosis when it is determined to be medically necessary because the medical criteria and guidelines noted below are met.

Benefits Application

This medical policy relates only to the services or supplies described herein. Please refer to the Member's Benefit Booklet for availability of benefits. Member's benefits may vary according to benefit design; therefore member benefit language should be reviewed before applying the terms of this medical policy.

When Alemtuzumab (Lemtrada) is covered

Alemtuzumab (Lemtrada) may be medically necessary when the following criteria are met:

Alemtuzumab (Lemtrada[®])

1. The patient has relapsing multiple sclerosis (to include relapsing-remitting disease and active secondary progressive disease), and
2. The patient has had an inadequate response to two or more drugs indicated for the treatment of multiple sclerosis.

When Alemtuzumab (Lemtrada) is not covered

Alemtuzumab (Lemtrada) is considered not medically necessary when criteria under “When Alemtuzumab (Lemtrada) is covered” are not met.

Policy Guidelines

Alemtuzumab (Lemtrada) is administered by intravenous infusion.

For the treatment of **relapsing multiple sclerosis**, initial treatment consists of two courses: the first treatment course is 12 mg/day administered on 5 consecutive days, followed by the second treatment course of 12 mg/day administered on 3 consecutive days (36 mg total dose) 12 months after the first treatment course. Subsequent treatment courses of 12 mg/day on 3 consecutive days may be administered, as needed, at least 12 months after the last dose of any prior treatment course.

Site of Care Eligibility

1. Alemtuzumab administration may be given in an inpatient setting if the inpatient setting is medically necessary. An inpatient admission for the sole purpose of alemtuzumab infusion is not medically necessary, OR
2. Alemtuzumab administration in a hospital outpatient setting is considered medically necessary if the following criteria are met:
 - a. History of mild adverse events that have not been successfully managed through mild pre-medication (diphenhydramine, acetaminophen, steroids, fluids, etc.), OR
 - b. Inability to physically and cognitively adhere to the treatment schedule and regimen complexity, OR
 - c. First infusion, OR
 - d. Less than 3 months since first alemtuzumab infusion, OR
 - e. First infusion after six months of no alemtuzumab infusions, OR
 - f. Requirement of a change in alemtuzumab product.
3. Members who do not meet the criteria above are appropriate for alemtuzumab administration in a **home-based infusion** or physician office setting with or without supervision by a certified healthcare professional. Inpatient and hospital outpatient infusion, in the absence of the criteria in #1 or #2 above is considered not medically necessary.

Billing/Coding/Physician Documentation Information

This policy may apply to the following codes. Inclusion of a code in this section does not guarantee that it will be reimbursed. For further information on reimbursement guidelines, please see Administrative Policies on the Blue Cross Blue Shield of North Carolina web site at www.bcbsnc.com. They are listed in the Category Search on the Medical Policy search page.

Applicable codes: J0202

BCBSNC may request medical records for determination of medical necessity. When medical records are requested, letters of support and/or explanation are often useful, but are not sufficient documentation unless all specific information needed to make a medical necessity determination is included.
