

## Corporate Reimbursement Policy

### Multiple Procedure Payment Reduction on the Technical Component (TC) of Diagnostic Cardiovascular and Ophthalmology Procedures

**File Name:** multiple\_procedure\_payment\_reduction  
**Origination:** 7/2013  
**Last Review:** 12/2019  
**Next Review:** 12/2020

#### Description of Procedure or Service

---

Many diagnostic services are composed of a technical and a professional component. The technical component refers to the equipment and technician utilized during performance of the test. The professional component refers to the interpretation (or reading) of the results of a test.

When multiple diagnostic services are furnished to the same patient on the same day, most of the clinical labor activities and most supplies are not performed or furnished twice. The following clinical labor activities are performed once during the session and are duplicated for subsequent procedures, creating an overlap in the services comprising the separately billed technical components:

- Greeting the patient,
- Positioning and escorting the patient,
- Providing education and obtaining consent,
- Retrieving prior exams
- Setting up the IV,
- Preparing and cleaning the room.

In addition, the supplies used are not duplicated for subsequent procedures.

The reduced payment for additional procedures is based on the concept that, when services are rendered together, there are efficiencies that occur that would result in duplicate payment of practice expenses and pre- and post-procedure work if all procedures were paid in full.

The multiple procedure payment reduction on diagnostic cardiovascular and ophthalmology procedures apply when multiple services are furnished to the same patient on the same day during the same session. The multiple procedure payment reductions apply independently to cardiovascular and ophthalmology series. The reductions apply to technical-only services, and to the technical component of global services.

# Multiple Procedure Payment Reduction on the Technical Component (TC) of Diagnostic Cardiovascular and Ophthalmology Procedures

## Policy

---

**When multiple diagnostic cardiovascular services are performed during the same outpatient patient session, the allowance for the technical component of the primary procedure is 100%. The allowance for the technical component of the second and each subsequent imaging procedure is 75%.**

**When multiple diagnostic ophthalmology services are performed during the same outpatient patient session, the allowance for the technical component of the primary procedure is 100%. The allowance for the technical component of the second and each subsequent imaging procedure is 80%.**

## Benefits Application

---

This medical policy relates only to the services or supplies described herein. Please refer to the Member's Benefit Booklet for availability of benefits. Member's benefits may vary according to benefit design; therefore member benefit language should be reviewed before applying the terms of this medical policy.

## When the reduced allowance is applicable

---

The reduced allowance for the technical component of the second and subsequent procedures will apply when:

- Multiple procedures are performed on the same patient during the same outpatient session.
- A single procedure is submitted with multiple units.

## When the reduced allowance is not applicable

---

The reduced allowance for the technical component of the second and subsequent procedures will not apply when:

- Multiple procedures are billed, appended with the appropriate modifier to indicate the procedure was done on the same day but not during the same session.
- If a global fee is charged by one provider, an additional component fee from another provider will not be reimbursed. (Global fees include both a professional and technical component.)

Multiple procedure payment reductions do not apply to professional component services.

## Policy Guidelines

---

**Benefits will be determined based on 100% of the allowed amount for the primary procedure. The primary procedure is considered the service with the higher RVU of current year NC Medicare rates.**

**Services provided on an inpatient basis are not subject to the reduced allowance for the overlapping technical components.**

**When multiple procedures are obtained on the same patient in the same setting and billed on a global basis (technical and professional fees billed on one claim line), reduced allowance applies to the technical component only.**

## Billing/Coding/Physician Documentation Information
