Corporate Reimbursement Policy

Telehealth

File Name: telehealth
Origination: 11/1997
Last Review: 12/2018
Next Review: 12/2019

Description

Telehealth is a potentially useful tool that, if employed appropriately, can provide important benefits to patients, including: increased access to health care, expanded utilization of specialty expertise, rapid availability of patient records, and the reduced cost of patient care.

Centers for Medicare and Medicaid Services (CMS) promote telemedicine as beneficial and useful to improve primary and preventative care to Medicare beneficiaries who live in underserved and rural areas. CMS states that telemedicine provides remote access for face to face services such as consultations, office visits, preventative care, and mental health services. Telemedicine, the use of telecommunications technology to deliver medical diagnostic, monitoring, and therapeutic services when health care users and providers are geographically separated, offers great promise for reducing access barriers for chronically ill Medicare beneficiaries.

Definition of services:

Telehealth is the use of medical information exchanged from one site to another via electronic communications to improve a patient’s clinical health status. Telehealth includes a growing variety of applications and services using two-way video, email, smart phones, wireless tools and other forms of telecommunications.

The terms "telemedicine" and "telehealth" are often used interchangeably, although "telehealth" is intended to include a broader range of services such as videoconferencing, remote monitoring, online medical evaluations, and transmission of still images. The main proposed advantage of telehealth is the capability of delivering medical services to distant areas with low access to medical specialists. For the purposes of this policy, “telemedicine” refers specifically to the subset of telehealth represented by the delivery of clinical services via synchronous, interactive audio and video telecommunications systems.

There has been interest on behalf of patients and providers to use electronic means to manage common medical conditions in lieu of a formal office visit. Online medical evaluations using Internet resources is a subset of telehealth that gives health providers the ability to interact with patients through a secured electronic channel. For the purposes of this policy, online medical evaluations may include communication by any secured electronic channel. Online medical evaluations are non-face-to-face evaluation and management (E/M) services by a physician or other non-physician qualified health care professional, typically in response to a patient’s online inquiry, and are used to address non-urgent ongoing or new symptoms.

Professional Oversight and Regulation:

North Carolina has enacted Senate Bill 780 which requires that non-resident physicians who treat patients through the use of electronic or other media shall be licensed in this state and shall be subject to reasonable regulations by the North Carolina Medical Board. This bill went into effect September 17, 1997.

According to the November 2014 North Carolina Medical Board (NCMB) position statement for telemedicine, licensees practicing via telemedicine will be held to the same standard of care as
Telehealth

licensees employing more traditional in-person medical care. A failure to conform to the appropriate standard of care, whether that care is rendered in-person or via telemedicine, may subject the licensee to potential discipline by NCMB. There is not a separate standard of care applicable to telemedicine. Telemedicine providers will be evaluated according to the standard of care applicable to their area of specialty. Additionally, telemedicine providers are expected to adhere to current standards for practice improvement and monitoring of outcomes.

The American Medical Association (AMA) has issued policy H-160.937, titled, “The Promotion of Quality Telemedicine.” This policy includes three principles, summarized below, for responsible use of electronic communication in providing healthcare.

1. The physician is responsible for supervising the safety and quality of services provided to patients by non-physician providers through telemedicine.
2. Supervising physicians are required to visit sites where patients receive care from non-physician providers. They must also have knowledge of the non-physicians qualifications and should be able to contact those providers as necessary. Both supervising providers and non-physician providers must conform to the applicable medical practice act in the state where the patient receives services.
3. Providers who utilize telemedicine systems, must maintain recording, reporting and supervision of patient care and conform to confidentiality and privacy principles.

The North Carolina Board of Pharmacy (NCBOP) has published rules regarding the appropriate handling of prescriptions. Telemedicine providers are expected to adhere to the NCBOP rules as outlined regarding prescriptions. These rules are available at: [http://www.ncbop.org/LawsRules/Rules.pdf](http://www.ncbop.org/LawsRules/Rules.pdf)

**Policy**

BCBSNC will provide reimbursement for Telehealth services as outlined in the Reimbursement Guidelines listed below.

**Benefits Application**

This medical policy relates only to the services or supplies described herein. Please refer to the Member's Benefit Booklet for availability of benefits. Most member benefit booklets exclude services for telephonic (audio only) evaluation and services that are primarily educational or administrative. Some member benefits may offer additional telehealth access through specialized vendor services.

Member's benefits may vary according to benefit design; therefore member benefit language should be reviewed before applying the terms of this medical policy.

**Reimbursement Guidelines**

Services using telemedicine technologies between a provider in one location and a patient in another location, may be reimbursed when all of the following conditions are met:

- The patient is present at the time of service;
- All services provided are medically appropriate and necessary;
- A service provided to a member located in North Carolina is rendered by a provider licensed to practice independently in the state of North Carolina;
- The encounter satisfies the elements of the patient-provider relationship, as determined by the relevant healthcare regulatory board of the state where the patient is physically located;
Telehealth

- The service takes place via an interactive audio and video telecommunications system. Interactive telecommunications systems must be multi-media communication that, at a minimum, includes audio and video equipment permitting real-time consultation among the patient, consulting practitioner, and referring practitioner (as appropriate);

- The service is conducted over a secured channel with provisions described in Policy Guidelines;

- A permanent record of online communications relevant to the ongoing medical care and follow-up of the patient is maintained as part of the patient’s medical record;

- The extent of any evaluation and management services (E/M) provided over the Telemedicine technology includes at least a problem focused history and straightforward medical decision making, as defined by the current version of the Current Procedural Terminology (CPT) manual.

Online medical evaluations for evaluation and management services may also be reimbursed when criteria for telemedicine technologies noted above are met.

Telemedicine services are not reimbursed for the following:

- Telemedicine that occurs the same day as a face to face visit, when performed by the same provider and for the same condition.

- Services performed via asynchronous communications systems, except for online medical evaluations.

- Services performed via telephonic (audio only) consultations. (See Section “Benefits Application” regarding availability of member benefits for telephonic services.)

- Triage to assess the appropriate place of service and/or appropriate provider type.

- Patient communications incidental to E/M, counseling, or medical services covered by this policy, including, but not limited to:
  - Reporting of test results;
  - Provision of educational materials.

- Administrative matters, including but not limited to, scheduling, registration, updating billing information, reminders, requests for medication refills or referrals, ordering of diagnostic studies, and medical history intake completed by the patient.

- New and established outpatient E/M and outpatient consultation E/M services performed without an intervening provider present with the patient, except:
  - when reimbursed as online medical evaluations, or
  - for behavioral health evaluation and management services.

Online medical evaluations for evaluation and management services are not reimbursed for the following:

- Online medical evaluations occurring more than once within 7 days for the same episode of care and rendered by the same health care provider.

- Online medical evaluations that occur within 7 days after a face to face evaluation and management service performed by the same provider for the same condition, whether provider requested or unsolicited patient follow-up.
Telehealth

- Triage to assess the appropriate place of service and/or appropriate provider type.

- Patient communications incidental to Evaluation and Management, counseling, or medical services covered by this policy, including, but not limited to:
  - Reporting of test results;
  - Provision of educational materials.

- Administrative matters, including but not limited to, scheduling, registration, updating billing information, reminders, requests for medication refills or referrals, ordering of diagnostic studies, and medical history intake completed by the patient.

Policy Guidelines

Telehealth is an effective means of providing healthcare to patients with accessibility problems, including living in isolated communities, physical disabilities or chronic illnesses. Telehealth has become increasingly important in the healthcare community and general population. In light of the capabilities offered by electronic communication and care, the North Carolina General Assembly issued a requirement to study an expansion of Telehealth. The intent of the General Assembly was to improve healthcare access for the underserved patients of the state.

Security and Confidentiality

Providers who utilize telemedicine systems must consider security, patient confidentiality, and privacy. A secured electronic channel is required to be utilized by a telemedicine provider. The electronic channel must be secure, encrypted, and include and support all of the following:

- A mechanism to authenticate the identity of correspondent(s) in electronic communication and to ensure that recipients of information are authorized to receive it.

- The patient’s informed consent to participate in the consultation, including appropriate expectations, disclaimers and service terms, and any fees that may be imposed. Expectations for appropriate use must be specified as part of the consent process including: use of specific written guidelines and protocols, avoiding emergency use, heightened consideration of use for highly sensitive medical topics, relevant privacy issues.

- An established turnaround time for responses from the provider. The system should alert the physician or practice that there is an outstanding request for an e-visit.

- Structured symptom assessment and risk reduction features. (i.e., patients are directed to contact the practice and/or emergency room if certain symptoms are reported).

- An electronic communication system that generates an automatic reply to acknowledge receipt of messages or indicates that the provider is unable to respond.

- The name and patient identification number.

- A standard block of text contained in the provider’s response that displays the physician’s full name, contact information and reminders about security and the importance of alternative forms of communication for emergencies.

- No inclusion of third party advertising and the patient’s information is not to be used for marketing.

- Payment Card Industry Data Security Standard (PCI-DSS) compliant.
Telehealth

**Licensing**

The practice of medicine is deemed to occur in the state in which the patient is located. Therefore, any provider using telemedicine to provide medical services to patients located in North Carolina should be licensed to practice medicine in North Carolina. North Carolina licensees intending to practice medicine via telemedicine technology to treat or diagnose patients outside of North Carolina should check with other state licensing boards. Most states require physicians to be licensed, and some have enacted limitations to telemedicine practice or require or offer a special registration. A directory of all U.S. medical boards may be accessed at the Federation of State Medical Boards website: [http://www.fsmb.org/directory_smb.html](http://www.fsmb.org/directory_smb.html).

The provider using telemedicine should verify the identity and location of the patient and should be prepared to inform the patient of the provider’s name, location and professional credentials.

**Prescribing of Controlled Substances**

It is the position of the North Carolina Medical Board that prescribing controlled substances for the treatment of pain by means of telemedicine is not consistent with the standard of care. Providers prescribing controlled substances for other conditions by means of telemedicine within North Carolina should follow all relevant federal and state laws, and are expected to participate in the Controlled Substances Reporting System.

**Billing/Coding/Physician Documentation Information**

This policy may apply to the following codes. Inclusion of a code in this section does not guarantee that it will be reimbursed. For further information on reimbursement guidelines, please see Administrative Policies on the Blue Cross Blue Shield of North Carolina web site at www.bcbsnc.com. They are listed in the Category Search on the Medical Policy search page.

*Telehealth services should be reported with place of service code 02.* **NOTE:** not all places of service may be appropriate for telehealth services.

**Applicable service codes and modifiers for telehealth services:**

- 90791, 90792--Psychiatric diagnostic evaluation services
- 90832, 90833, 90834, 90836, 90837, 90838--Psychotherapy services
- 90845--Psychoanalysis
- 90847--Family psychotherapy
- 96040, S0265--Genetic counseling
- 96116--Neurobehavioral status exam
- 96150, 96151--Health behavior assessment
- 98969, 99444--Online evaluation and management, established patient
- 99201, 99202, 99203, 99204, 99205--New outpatient evaluation and management
- 99212, 99213, 99214, 99215--Established outpatient evaluation and management
- 99240, 99242, 99243, 99244, 99245--Outpatient consultation evaluation and management
- 99499--Unlisted evaluation/management
Telehealth

G0108, G0109--Diabetic training
G0406, G0407, G0408--Inpatient telehealth consult
G0425, G0426, G0427--Telehealth consult ED
G0508, G0509—telehealth consultation, critical care

Modifier GQ—(Via asynchronous telecommunications systems). Service codes noted above will not be allowed when modifier –GQ is appended. (See the member’s benefit booklet regarding availability of member benefits for asynchronous telehealth services. Some member benefits may offer additional telehealth access through specialized vendor services.)

Use of Modifier GT (Via interactive audio and video telecommunications systems) and Modifier 95 (Synchronous telemedicine service rendered via a real-time interactive audio and video telecommunications system) are optional. (CMS no longer recognizes GT modifier.)

See also Corporate Reimbursement Policy titled, "Modifier Guidelines "

Online evaluation and management services:

Online evaluation and management (online medical evaluations) for new patients should be reported with an Unlisted evaluation and management code (CPT 99499) and place of service code 02 to indicate the telehealth service.

Online evaluation and management (online medical evaluations) should not be reported with New outpatient evaluation and management (CPT 99201-99205, Established outpatient evaluation and management (CPT 99212-99215), or Office consultation codes (99241- 99245) unless an intervening provider is present with the patient.

Incidental services:

The transmission of digitalized data is considered integral to the procedure being performed and is not reimbursed separately.

HCPCS Q3014 (Origination fee) is considered non-covered.

Telemedicine that occurs the same day as a face to face visit is considered incidental to the face to face service when performed by the same provider and for the same condition; in this situation the telemedicine visit is not separately payable.

Online medical evaluations and telemedicine services billed within the post-operative period of a previously completed major or minor surgical procedure will be considered part of the global payment for the procedure and not paid separately.

Online medical evaluations occurring more than once within 7 days for the same episode of care and rendered by the same health care provider are not separately reimbursed.

Online medical evaluations that occur within 7 days after a face to face evaluation and management service performed by the same provider for the same condition are considered incidental to the face to face evaluation and management services, and are not separately reimbursed.

Eligible providers: Providers performing and billing telehealth services must be eligible to independently perform and bill the equivalent face to face service.

| 7/16/07 | Definition of Telemedicine revised and definition of Telehealth added to Description section. Policy statement revised to read: BCBSNC will provide coverage for Telemedicine or Telehealth services when it is determined to be medically necessary because the medical criteria and guidelines shown below are met. Interpretation of lab or radiology services by providers who are not licensed in the state of North Carolina is not covered. Note added to Benefits Application section: reimbursement for telephone consultations is excluded by most benefit plans. Criteria for coverage of Telemedicine evaluation and management and consultation services added to When Telemedicine is Covered section. Following statement added to When Telemedicine is Not Covered section: BCBSNC does not reimburse for evaluation and management and consultations services provided via telephone, Internet, or other communication network or devices that do not involve direct, in-person patient

3/20/12 Specialty Matched Consultant Advisory Panel review meeting 2/29/2012. No change to policy statement. (lpr)

5/15/12 Added CPT codes 90801, 90862 to Billing/Coding section. (UHS Telepsychiatry). (lpr)

12/28/12 Deleted CPT code 90862 from Billing/Coding section for effective date 1/1/13. (lpr)

4/16/13 Deleted CPT code 90801 from Billing/Coding section for 2013 coding update. (lpr)

3/11/14 Specialty Matched Consultant Advisory Panel review meeting 2/25/2014. No change to policy statement. (lpr)

12/30/16 Codes G0508, G0509 added to Billing/Coding section. Added Modifier 95—Synchronous Telemedicine Service Rendered Via a Real-Time Interactive Audio and Video Telecommunications System and Place of Service 02—The location where health services and health related services are provided or received, through a telecommunication system which are effective January 1, 2017. The following statement regarding place of service
Telehealth

was deleted: *Telemedicine and online medical evaluation services without an intervening provider should be submitted with the place of service that would be appropriate if the service had occurred face to face. Telemedicine services with an intervening provider should be submitted with a place of service code to indicate the facility or physical location of the member and intervening provider.* The Telehealth Provider Coding Grid was deleted. (an)

8/25/17  Typos corrected. (an)

12/29/17  Updates to Billing/Coding section. Telehealth services should be reported with place of service code 02. Use of modifiers GT and 95 are optional. (an)

12/31/18  Routine review. Codes 0188T, 0189T deleted. No change to policy. (an)

2/12/19  Additional to Reimbursement Guidelines: “New and established outpatient E/M and outpatient consultation E/M services performed without an intervening provider present with the patient, except: when reimbursed as online medical evaluations or for behavioral health evaluation and management services.” Revision to Billing/Coding section: “Modifier GQ—(Via asynchronous telecommunications systems). Service codes noted above will not be allowed when modifier –GQ is appended. (See the member’s benefit booklet regarding availability of member benefits for asynchronous telehealth services. Some member benefits may offer additional telehealth access through specialized vendor services.)” Medical Director review 1/2019. (an)

Medical policy is not an authorization, certification, explanation of benefits or a contract. Benefits and eligibility are determined before medical guidelines and payment guidelines are applied. Benefits are determined by the group contract and subscriber certificate that is in effect at the time services are rendered. This document is solely provided for informational purposes only and is based on research of current medical literature and review of common medical practices in the treatment and diagnosis of disease. Medical practices and knowledge are constantly changing and BCBSNC reserves the right to review and revise its medical policies periodically.
